Learn and Live

**American Heart Association (AHA)
Basic Life Support (BLS)
For Healthcare Providers
2017**

Course Description: The Basic Life Support (BLS) for Healthcare Providers (HCP) Course is a video-based, Instructor-led course that teaches both single-rescuer and team basic life support. This course trains participants to promptly recognize several life-threatening emergencies, give high-quality chest compressions, deliver appropriate ventilations and provide early use of an AED. BLS for Healthcare Providers teaches skills using the American Heart Association's proven Practice-While-Watching technique, which allows Instructors to observe students, provide feedback and guide students' acquisition of skills. With their student manual for the course, students receive the new Pocket Reference Card, designed to provide quick emergency information to the rescuer at any time.

Who should attend? - This course is for healthcare professionals who need to know how to perform CPR, as well as other lifesaving skills, in a wide variety of in-hospital and out-of-hospital settings.

Course Schedule: The program is offered on the following dates from 9:00am to 1:00pm
